Nelson, N. H., Feb. 6, 1950

REPORT OF SUPERINTENDENT OF SCHOOLS

Members of The School Board and Citizens of Nelson :

As your new superintendent of schools, I find myself writing a report on your school based upon only five months observation. I know little about the past history of the school and no man is wise enough to be accurate about the future ; so I have decided to discuss the present.

Nelson is fortunate, in these days of teacher shortages, to have their school and pupils in the care of Mrs. Freda Hastings, whom I regard as a very capable teacher and guide for our pupils.

Within a short time we will install a guidance program and folder in the school, modeled after that used in Keene. Each child will have a guidance folder with a picture attached and the folder will contain a record of school marks, results of intelligence tests, aptitude tests, the health record, school activity items and family data. This folder will follow the pupil through the grades and be sent to High school with him. It will serve as an important device in making school work more meaningful and helpful.

The school union has recently purchased a highly scientific audiometer for determining the hearing disability of the pupils and this will be available at any time. Action has already been taken to obtain The Massachusetts Visual Testing equipment, the best known for determining sight difficulties. In line with this health maintenance, all children will be able to have their teeth cleaned and treated with flourine to prevent decay. This service, valued at \$15 per child, will be offered free by The United States Government through the State Dental Department.

Special emphasis is being placed on visual education this year; and there will soon be available in the union several slide film projectors and a complete library of film covering the subjects from grade one to eight.

STATISTICS

July 1, 1948 to June 30, 1949

1. Pupils registered in the district this year 32
2. Number of days school was legally in session 181
3. Number of pupil-days lost by absences 301
4. Percent of absence 5.54%
5. Number of school years lost by absences 1 yr. 6 months

These figures show that 5.54% of all school time for the year was lost by absences on the part of pupils. This absence rate is not the highest in the district; but is much too high. Pupils lost a year and a half of good school instruction and this is a serious loss to the child in terms of his education. It is

also a serious loss to the town in terms of money wasted and represents a sum of \$594. Studies show that less than 2% of school absences are for really justifiable cause. We do not, of course, want sick children in school but we can't afford to have well children at home. Only by realizing the loss in time, money and school progress will parents understand the need for their cooperation in obtaining better attendance.

CONCLUSION

I appreciate the fine spirit of cooperation on the part of the Board of Education, the teacher and the school patrons of the community, with whom I have worked; all are sincerely interested in maintaining our school at a high level.

Sincerely,

CHARLES L. BOWLBY.

FOREST FIRES—OUR MOST SHAMEFUL WASTE

Everyone apparently fears fires but too many are careless with it. This is particularly true of fires in and near woodlands. Official figures show that more than 98 percent of all forest fires result from human carelessness and can be prevented. Consequently, we may say "Forest Fires are our most shameful waste".

Annual forest fire losses are tremendous and their effects far reaching. Such fires destroy the raw products of the forests, the protection forests provide for game and the supply of ground water. They upset local economies by drawing men from gainful employment and requiring the expenditure of public funds to extinguish them.

Our forest fire organization is doing a good job in keeping the size of fires small but the number of fires is increasing. In 1949 there were 100 more fires in New Hampshire than in 1948, but they burned 500 acres less. For the warden and his deputies to do the job they are capable of, they must have the cooperation of the public—YOU!

The primary objective of all fire fighters is PREVENTION—fire stoppage. This is the goal toward which your local forest fire warden and his deputies are constantly working. It can be achieved ONLY if YOU and YOU cooperate with them. It is worth YOUR effort and can be accomplished by:

- (1) Being careful with fire in or near woodland, being particularly careful with matches and cigarettes.
- (2) Securing the required written permit from the warden when the ground is not covered with snow.
- (3) Insisting that others be careful and comply with burning requirements.
- (4) Calling the warden promptly when fire is detected and aiding him to extinguish it.

Let's reduce the number of forest fires and eliminate our most shameful waste.
